Highwatch

AERIAL EVENT AWARENESS · BY VIGILANTEYE MONITORING

See the whole event. Including after dark.

An RGB and thermal aircraft on station above your festival, concert, game day or parade — with one shared live picture for your command post, medical and security teams. Crowd flow, perimeter, parking and lost-person searches, seen from above while there is still time to act.

ILLUSTRATIVE 3D RENDERING · PERSON DOWN MARKED, LOCATION SENT TO COMMAND POST AND MEDICAL

01 · CROWD

Density & flow

Gates, stages and bars watched for bottlenecks, relayed before they become incident reports.

02 · PERIMETER

Fence lines & lots

Unstaffed entry points, after-dark approaches and parking backups, so you redirect early.

03 · THERMAL

Search & medical

A thermal sweep for a lost person, and the fastest path through a packed field to someone down.

- FAA PART 107 PILOTS
- VISUAL OBSERVER EVERY FLIGHT
- AIRSPACE AUTHORIZATION FILED
- NO FACIAL RECOGNITION
- FLIGHT LOG & AFTER-ACTION REPORT

Book a flight day

Half day from $1,450 · ten days' notice for airspace

How a Highwatch day works

FOR FESTIVAL & EVENT ORGANIZERS

01 From booking to the last lot emptying

10+ DAYS OUT
Book & sign
Proposal, then one online packet: terms, flight authorization, services agreement, site questionnaire.

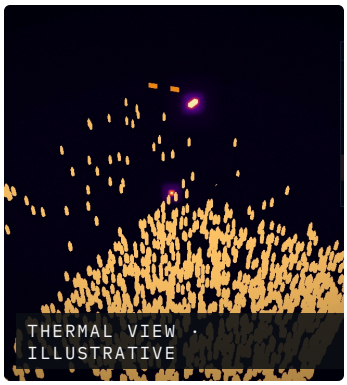

7 DAYS OUT
Plan & file
Site survey, airspace authorization, written risk assessment, launch area and comms plan agreed.

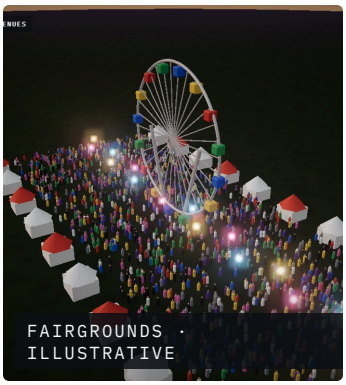

EVENT DAY
On station
A planned orbit from gates opening, live feed to your teams and our monitoring center.

AFTER
The record
Flight log, timestamped footage and a written summary for your insurer and next year's plan.

02 What we watch for

- **Crowd density** at gates, stages and bars, before a bottleneck forms.
- **Perimeter integrity** — gate-crashers and unstaffed entry points, on thermal after dark.
- **Lost-person search** while ground teams are still being briefed.
- **Parking & traffic** — lot fill and road backup, so you redirect early.
- **Medical assist** — an overhead route to a person on the ground.
- **After-action record** for insurers, permits and next year's layout.

03 Flight rates

PRICED BY FLIGHT DAY	NOT BY CAMERA
Half day · up to 4 hours	**$1,450**
Full day · up to 8 hours	**$2,600**
Second aircraft & pilot required past 6 hours continuous	**+$950/day**
Survey, airspace filing & flight plan	**$450 once**
Additional hours	**$395/hour**
Multi-day festivals	**−15% day 3+**

Every proposal is subject to airspace authorization. If we cannot legally or safely fly, you pay the survey and filing fee only. Rates exclude sales tax.

READY TO BOOK

Give us ten days. We will have airspace in hand before your gates open.

Certificate of insurance on request. Site walk-throughs are free.

OUR COMMITMENTS OVER YOUR CROWD

- ✓ The pilot in command decides — weather, airspace, crowd or fatigue.
- ✓ We fly the perimeter, not over the crowd.
- ✓ No audio, ever. Neighbors' property is never viewed.
- ✓ No flight in wind or gusts over the aircraft's limit, never above 12 m/s.
- ✓ Areas and flows, never individuals. No facial recognition.
- ✓ Footage is yours, and never used for marketing without consent.
